Weekly Coal Production

Energy Information Administration
Washington, D C

Production for Week Ended:
February 15, 1986

Highlights

U.S. coal production in the week ended February 15, 1986, as estimated by the Energy Information Administration, totaled 16.59 million short tons (bituminous coal and lignite, 16.52 million short tons; Pennsylvania anthracite, .07 million short tons). This was 7.1 percent lower than the previous week, and was 9.5 percent higher than production in the corresponding week of 1985.

Cumulative U.S. coal production from January 1 through February 15, 1986, was estimated at 110.29 million tons, 6.8 percent above the 103.29 million short tons produced in the comparable period in 1985.

The methodology used to make weekly estimates of coal production was last published in the Weekly Coal Production (DOE/EIA-0218(84/40)).
